PROFILE SUMMARY

Results-driven MERN Stack Developer with 4+ years of hands-on experience in web development. Specializes in designing secure sign-in systems and seamlessly integrating Stripe payment solutions. Proficient in leveraging APIs for robust and scalable solutions

---

SKILLS

- ★ HTML,CSS
- ★ JavaScript
- ★ React
- ★ Node js
- ★ Express
- ★ Mongo DB
- ★ Mongoose
- ★ Data Fetching
- ★ Rest APIs
- ★ Firebase
- ★ Debuging
- ★ Canvas
- ★ Version Control/Git
- ★ Shoppify Setup
- ★ Web Aplplication Architecture
- ★ Word Press
- ★ Adaptability
- ★ Time Management

WORK EXPERIENCE

FRONT END

- Developed a local banking application using HTML, CSS, and JavaScript, enabling users to perform CRUD operations seamlessly, including account creation, deletion, balance checking, and loan applications.

- Implemented security measures such as encryption, secure authentication, and form validations, showcasing technical proficiency in creating a visually appealing and secure web application.

REACT JS

- I build a movie streaming app and the key feature of the app was its integration with the IMDb API, allowing users to seamlessly watch and rate movies while pulling accurate and up-to-date data from IMDb.

- This project not only showcased my technical expertise in app development but also demonstrated my ability to leverage external APIs strategically to enhance product functionality. The positive user feedback and increased engagement metrics were indicative of the project's success

BACEND

- In my recent project, I build a sign-in system that seamlessly stores user data in a MongoDB database. The system features a user-friendly sign-in form where users can securely log in using their email credentials

- To enhance user convenience, I integrated Firebase authentication, enabling users to sign in with their email through Firebase

W O R D P R E S S

- Throughout the 1st half of 2022, I specialized in constructing and optimizing WordPress websites, demonstrating proficiency in web development. And also successfully integrated Stripe payment systems into these sites, ensuring seamless transactions and enhancing overall functionality.

S H O P I F Y

- I recently completed a Shopify project, establishing a dropshipping store for automotive accessories. Notably, I seamlessly incorporated the Stripe payment system for secure transactions.

H O S T I N G

- Deep understanding in deploying and managing hosting services (Namecheap, GoDaddy, Netlify, Vercel), including domain registrations, hosting accounts, and deployment workflows, and also configuring build pipelines, integrating version control systems, and deploying applications.

- Proficient in ChatGPT, GitHub Copilot, and Black-Box methodologies for efficient problem-solving and debugging, with a collaborative approach, strong documentation skills, and a commitment to knowledge sharing, which leads to increase in productivity

All the above projects can be found on my Github profile and also on my portfolio website

Education : Degree

Certification : Data Structure and Algorithm / Google Garage Digital marketing Certs
